

Selected FAQ

Q: ICC profiles that are included with the Epson Stylus Pro 9880 are labeled by their acronyms. Is there a list that explains these acronyms and their definitions?

A: Profiles ending in **MK** are to be used when the Matte black ink is installed as the primary black, and **PK** is for Photo black.

Any profile ending in **250** is intended for the roll stock or 17" sheets of that particular media. These profiles are intended for use with any driver resolution available.

For PremierArt Water Resistant Canvas for Epson, choose the **Watercolor Paper - Radiant White** setting.

ICC Profile	Media Name	Spindle size
