OWC Mercury Elite Pro Dock

Thunderbolt 3 | 1Gb Ethernet | RAID controller | Mac & Windows

The Do-It-All Tool for Digital Workflows

Featuring dual drive bays and seven ports of connectivity, the OWC Mercury Elite Pro Dock is the drive-dock solution you need to organize your digital life. Perfect for photographers and videographers, you'll have plenty of room for duplicates and archives or extra power to render and process effects. Plus, with a 1Gb Ethernet connection, it helps streamline communication and collaboration in a shared workspace.

The Mercury Elite Pro Dock provides plenty of configuration options with easy installation of 2.5-inch or 3.5-inch HDDs or SSDs. For more flexibility, combine the speed of a SSD with the cost-effective size of a HDD. Or use the built-in hardware RAID to mirror drives with RAID 1, stripe with RAID 0, or use span on the drives for extra-large storage capacities.
